

**Bio:**

Bronagh Daly is a Certified Control Unleashed Instructor, Certified Family Dog Mediator, Certified One Mind Dogs Instructor, and a member of The Association of Professional Dog Trainers (APDT). She does not believe in one-size-fits all solutions and prides herself in her creative thinking, always ready to tailor every training solution to each individual dog! She also believes in continuing education, and regularly attends seminars and conferences such as Clicker Expo and The Aggression in Dogs Conference.

Bronagh has always loved animals, even traveling to South Africa to on a conservation trip at 16 to help the brown hyenas who are marked as near threatened in the IUCN Red List. Unsnaring traps on reserves and learning all the ways to help the misunderstood hyenas, solidified to her that working with animals would be a huge part of her life. Shortly after, Bronagh was able to get her first dog, Stella. And three years later, she started her training journey, competing in agility with Stella, who is now 15 years old. Since then, Bronagh has gone on to compete with her border collies Razzle and Oz. It was working through Razzle's stranger-directed reactivity and Oz's generalized anxiety disorder-induced long list of complicated fears that jumped started Bronagh's interest in behavior work and most shaped Bronagh into the trainer she is today. Today, both boys are successfully competing in UKI, AKC, and USDAA agility and find joy in what used to terrify them.

Overall, Bronagh's main goal is always to help everyone foster the strongest possible relationship with their dogs and give their dogs their best possible lives.
